

The block play course was so inspiring, we learnt so much about how children access the resources and were amazed by the photos and videos that captured their learning. It was so helpful to think about the role of the adult and how to encourage children to take risks within a secure environment. Thank you so much, we are looking forward to more courses!

The shared professional learning experience facilitated by the practitioners at Guildford Nursery School was valuable, informative and enjoyable.

Fantastic course with such a huge amount of knowledge, experience and dedication from the staff who were presenting. Would highly recommend and I am looking forward to my next opportunity to train with you!

Froebel is the first pioneer advocating learning through play and teaching children life skills. Guildford Nursery School and its educators are absolutely amazing at presenting Froebel's work and wonderful advocates of its research and work.

Thanks so much, was really beneficial to get more insights about block play and learning about the different stages. Definitely something I'm planning to take further in my own practice.

It was really helpful to hear how you manage the risk or teach children to manage it. This is similar to my approach but always nice to have reassurance.

Thank you, that was really interesting and inspiring. We have gained a lot of ideas from seeing the block play in action.

Very useful session with lots to think about. Will be discussing and implementing ideas from today with my colleagues. Many thanks.

Thank you for today's training – it was really clear, simple and informative. We really liked the seven stages of block play. Thank you.

It was very informative and will use this training in everyday play and help encourage children to expand on their learning. Thank you.

It has been informative and helpful in building my confidence when supporting children and colleagues. Thank you for your help and support to education.

Great to see first-hand how Froebel's teaching can be beneficial to children's learning and development.

A big thank you to you and your staff for the inspiring, well delivered training and the resources you forwarded to me.

Fantastic course with some excellent ideas. I am currently working with 2-3 year olds who are just beginning to show interest in block play so I can feed back lots of ideas – many thanks.

Definitely worthwhile and it's given me lots of ideas to implement in my setting.
