

Excellent insight into quality practice and introducing Woodwork into early years settings. The staff made you believe it is possible by starting out on a small scale and gradually building up resources. Great to see the activities that are provided inside that supports the learning experiences outside.

The content was thorough and the ideas were presented clearly and logically. My questions were also answered.

Another simple and yet impactful course. Gave some great ideas that can be applied to practice straight away. Thank you

Fantastic practice sharing opportunities. Really insightful.

This course was very useful and lots of ideas.

Our team of Early Years and Key Stage One educators have found these twilight online sessions extremely accessible and interesting. As a setting, we are interested in developing our practice in line with Froebelian principles...

... The team at Guildford Nursery School have provided us with the time to talk and demonstrated how this is being embedded there to enable positive, meaningful outcomes for children. The live link to provide a context for professional dialogue between practitioners is most appreciated and inspirational.
