

An experience of excellence reminding me what quality Early Years looks like.

You give hope and inspiration to so many of us.

Immersing yourself in a balanced day of theory, reflection and improving practice is like having cream on your favourite pudding! It is sustaining and wholesome to my soul.

Today was phenomenally engaging and inspiring. The keynote speaker's knowledge and expertise shone as did the incredible environment.

The Froebel conference at Guildford Nursery School was like switching on the lights.

When educators and researchers work together the whole they create is far more than the sum of their parts.

We need you to reproduce all over the country!

Today has renewed, reinforced and replenished my belief that there is hope for the future of those who support and educate our young children.

The team at Guildford Nursery School have welcomed us, enlightened us and connected us as a community who care about early childhood.

Very well organized. Everyone played an important part of this success.

Lovely balance of keynotes, research and practical workshops.

The enthusiasm that the staff share when they are articulating practice is infectious.

Educators talking to other educators is very powerful.

I wasn't sure what to expect from today but the staff were friendly, approachable and knowledgeable.

Thank you for putting it on in Guildford.

Aside from the immense quality of the content and learning you shared, the incredible friendliness of every member of your team really stood out. Thank you.

The best training day I have had in at least 5 years or more.

The Partnership provided the right mix of engaging speakers, workshops and networking opportunities to help me get the most from my day.
